

Is inefficient mobile working damaging your business?

Mobile working is now the norm, yet:

80% of workers feel it's harder to work in mobile teams.¹

33% of workers cite poor communications as their greatest challenge when mobile.¹

Not enabling mobile workers can carry a significant cost...

Common mobile worker complaints:

Lower job satisfaction as don't have access to the right tools for the job

Excluded by missing out on important communications

Frustrated at using tools which aren't designed for a mobile environment

Businesses suffer through:

Poor customer service as mobile workers often can't be easily contacted

Important decisions delayed as they don't have access to the right information

Security breaches due to employees using non-approved apps

Loss of valuable information when an employee leaves data stored on a personal phone

79% of knowledge workers now work in dispersed teams.²

60% of employees' time is spent away from their desk.³
