Is your communications strategy costing you time and money?

If your business is still operating on an outdated, premises-based communications system, it's more than just a mild annoyance of your employees.

Here's what you risk:

Wasting time   VS   Freeing up time

23%
of workers cite meetings as their primary productivity stopper

6.3 hrs **per day**
time workers spend checking emails

New collaborative tools and processes can cut as much as

30%
of wasted time

Losing money   VS   Saving money

-£6,900
Average amount small businesses spend recovering from hacks to their system

Constantly replacing old systems every

10-15 yrs
That's the average lifespan of a PBX phone system

£8,800
(per year, per employee)

How much a typical business would save on average, by allowing employees to work remotely using collaborative communication tools

£30 billion
the estimated value of UCaaS market by 2022

Ruining your reputation   VS   Protecting your reputation

The potential damage is significant and irreparable.

44% Hacked
of small businesses were hacked in 2015

17% of women

11% of men

state they'd permanently lose trust in a hacked company

Get on board with the

74%
of business that say social tools are already at least somewhat integrated into their employee's work.
